

# LOCAL GOVERNMENT TOOLS

---

Jim Doherty

Municipal Research & Services Center, Seattle

November 2007

# ENVIRONMENTAL CHECKLIST

---

We protect wetlands, salmon, and  
endangered species – why not homo  
sapiens?!?

WATER POLLUTION  
PREVENTION

# Mapping

---

Local government planning maps **MUST** include transmission pipeline infrastructure data!

# Consultation Zone

---

Early in the development process, REAL  
EARLY

- Educate developer regarding transmission pipeline issues
- Developer reviews proposed project with pipeline operator
- Pipeline operator makes decision concerning whether proposed action will impact pipeline integrity

# Setbacks

---

Protect people by protecting the  
pipe

# Construction Setbacks

---

- Keep the equipment and materials off the easement!
- Require a temporary barrier - fence

# Permit Center Procedures

---

Brochures and websites explaining permit procedures must include one-call requirements

Relevant for fences, lawn irrigation, putting up basketball backstop, etc.

# Clustering Development

---

Allow deviations from local government development regulations in situations where clustering will move residential or commercial development away from pipeline.

# Emergency Services & Evacuation

---

Zoning – Prohibit emergency communications, fire services, police facilities, hospitals, nursing homes, jails and other such facilities from being built in a location that would put them at risk if there was a catastrophic rupture – or require construction and design that minimizes risk.

DEC 13 2003

# Real Estate Disclosure

---

- ❑ Easements off the property are not disclosed in a title search
- ❑ Easement disclosure is opaque at best
- ❑ Too often disclosure occurs late in the process

ENJOY NEW ORLEANS!
