As required by the US/DOT/PHMSA Technical Assistance Grant (TAG) DTPH561GPPT17 Section 10.03 Final Report please find the letter-type written report to the AOR and the AA describing the results of all activities undertaken as a result of the grant.

Additionally as required by Section 10.04 Final Federal Financial Report please find attached the final Federal Financial Report, Standard Form 425 (SF-425), to report the status of all funds.

Should additional information be required to meet the requirement of this reporting period please do not hesitate to contact me by phone at (702) 822-8403 or by email kenya.henderson@lvvwd.com.

Regards,

Kenya Henderson
Grant Committee Chairperson

Results of all activities undertaken as a result of this grant:

NRCGA PHMSA TAG GRANT OBJECTIVE:

During the grant reporting period NRCGA proposed to provide pipeline awareness and safety, damage prevention, safe digging, and risk assessment training for Nevada excavators and homeowners. Training for the excavating community at large is proposed to be provided twelve times (12) annually. Technical skill-building training for underground utility locators is proposed and will be provided once per quarter to support damage prevention efforts. Awareness training and education for university engineering, construction management and technology classes is proposed to be provided four (4) times annually. Outreach is proposed through trade shows and conferences, the Damage Prevention Professional and Excavation Safety Guide and excavator awareness events which will be hosted twice annually.

NRCGA PHMSA TAG GRANT ACOMPLISHMENT:

During the grant reporting period the NRCGA successfully accomplished **damage prevention outreach** through attendance at the CGA 811 Excavation and Safety Conference/Expo held in Las Vegas March 8-10, 2016. NRCGA hosted 811 Safety Day which consisted of a keynote address on Pipeline Awareness and Safety, an underground safety summit, forums on new locating technology and common sense locates, exhibits and outdoor demonstrations on trench rescue, LiDAR mapping, ground penetrating radar, vacuum excavation, water tapping, overhead electric safety, and the day concluded with NRCGA Damage Prevention Training.

During the grant reporting period NRCGA successfully provided pipeline awareness and safety, damage prevention, safe digging, and risk assessment training for Nevada excavators and homeowners. Training for the excavating community at large was successfully provided twelve times (12) annually and technical skill-building training for underground utility locators was successfully provided to support damage prevention efforts.

During mid-term reporting period is was reported that due to delay in receiving TAG funds dispersed through the Delphi eInvoicing System, the NRCGA was not able to coordinate and schedule resources for the awareness training and education to be held for university engineering, construction management and technology classes. NRCGA proposed to provide this awareness training and education four (4) times annually through the grant reporting period but was not able to meet the university schedule to have the training added to the curriculum due to the delay in getting the initial disbursement.

The pipeline awareness and safety, damage prevention, safe digging, and risk assessment training for Nevada excavators and homeowners in addition to the training proposed at the university level both fall under the "**Awareness training/education for university engineering, construction management and technology class**" in the TAG Grant proposal. As the funds were not disbursed in time to meet the "university engineering, construction management and technology" segment of this proposed program the awareness training was completed to satisfaction for the excavating community at large twelve (12) times annually during the TAG Grant reporting period. The funding awarded for this program was used in full on the twelve trainings held for the excavating community.

Technical skill-building training for underground utility locators was proposed to be provided once per quarter during the grant award period to support damage prevention efforts. NRCGA successfully provided five (5) sessions of this training in Las Vegas, Reno and Elko, Nevada. The funding awarded for this program was used in full on the technical skill-building training for underground utility locators.
